Professional Summary

AI engineer and founder building production generative-AI systems: LLM applications, RAG pipelines and multi-agent workflows. Scaled an AI automation studio to **Rs 50,000/month** recurring in **6 months** at **100%** client retention, and co-built an EdTech platform serving **7,000+** students.

Skills

AI Engineering: LLM application architecture | Prompt engineering & structured outputs | Function calling & tool use | RAG (chunking, embeddings, vector search) | Multi-agent workflows | Responsible AI, grounding & hallucination control | Inference-cost optimization | Gemini, OpenAI, Claude, MCP, n8n
Programming: Python (Pandas, NumPy, Jupyter) | JavaScript | TypeScript | Java | SQL | Git & GitHub | REST APIs | Docker
Data Engineering: ETL pipelines | PostgreSQL & Supabase (RLS, Edge Functions, pgvector) | Vector databases & embedding pipelines | Schema design | MongoDB | React | Next.js
Business: Requirement discovery & scoping | Solution architecture | Proposals & pricing | Client and stakeholder communication | Product roadmap & GTM | Team and vendor management

Experience

Up N Running - AI Software Company | Founder | upnrunning.in — Jul 2025 - Present
- Scaled from zero to **Rs 50,000/month** recurring in **6 months** at **100%** client retention with no outside hires.
- Shipped production AI automation to **3** clients, cutting manual operations **90%** and saving **15+** hours/week.

BunkToBrains - Ed-Tech Startup | Co-Founder | bunktobrains.com — May 2025 - Present
- Co-built a platform serving **7,000+** students and **Rs 2,00,000+** revenue; owned technical architecture as one of **3** core developers.
- Built the **Stealth PDF Engine** - encrypted Bunny Storage streaming into browser memory to block piracy and scrapers; cut database load **85%** at peak.
- Drove **24,000+** monthly organic clicks via Next.js SEO and launched the recorded-course vertical.

Career Development Cell, VIPS-TC | Vice President — Jan 2025 - Present
- Second-in-command over CDC operations: placement drives, workshops and inter-college events for **1,000+** students, lifting engagement **40%**.

Projects

Socioverse SaaS - Multi-tenant generative-AI content platform | socioverse.io — Dec 2025
- Built the **Emotional DNA Engine**: schema-constrained JSON extraction of content features, re-synthesized to a target brand voice. Serves **125+** users.
- Chained ingestion, ideation, scripting, captioning and scheduling into one agent run with per-step model routing and fallback handling.
- Cut per-user inference cost to **$3-8/month** via model routing, prompt compression and caching; raised follower conversion **30-50%**.
- **Stack:** React 18, TypeScript, Supabase (Edge Functions & Auth), Gemini 2.0 Flash, Bunny.net.

Brain-Clone - Grounded RAG engine over a video corpus — Feb 2026
- Built the RAG pipeline: transcript ingestion, LLM fact extraction, **768-d** embeddings, pgvector retrieval, answer synthesis cited to source.
- Extracted **1,981** facts from **29** videos, embedded **1,620** into pgvector; enforced closed-book cite-or-refuse plus a citation-verification pass.
- **Stack:** Python, Gemini 2.5 Flash-Lite, PostgreSQL + pgvector.

OTO (Outreach To Onboard) - Agentic client-acquisition engine | video demo — Jul 2025
- Architected a full-cycle agent: lead enrichment, LLM-personalized outreach, reply classification and intent routing, proposal generation, onboarding.
- Gated every autonomous external send behind human approval - a responsible-AI control on agent action. **Stack:** Python, n8n, Apollo.io, GPT-5.

Education

Vivekananda Institute of Professional Studies - B.Tech, AI & ML | CGPA **8.5+/10** — 2023 - 2027

Arwachin International School, Delhi - CBSE | Class XII **94%** | Class X **84%** — 2021 - 2023

Achievements & Certifications

- **Winner** - HACK-KRMU Hackathon
- **NPTEL Certified** - Data Structure & Algorithm Using Java; Programming in Java
- **AI Automation Expert** - Udemy
- Former **District Chess Champion**
- Full certificate list: anshulrastogi.com/achievements
